

AITO TOKEN

WHITEPAPER FOR PRIVATE SALE

INTRODUCTION OF WEB 3.0

Web 3.0 is the new generation of internet services that utilize advanced machine-based learning and artificial intelligence to connect web-based applications together and form a more personalized web. Web 3.0 is the upcoming third generation of the internet where websites and apps will be able to process information in a smart human-like way through technologies like machine learning (ML), Big Data, decentralized ledger technology (DLT), etc. As Web 3.0 networks will operate through decentralized protocols — the founding blocks of blockchain and cryptocurrency technology — we can expect to see a strong convergence and symbiotic relationship between these three technologies and other fields.

AITO IS A DEFI PROJECT

The Project is to create a native token (AITO TOKEN) and a Dapp [decentralized application]. the Dapp will be in forms of multiple Platforms with multiple unique functionalities to bridge the gap between the real world and the DeFi world. Taking advantage of decentralized technology such as web3.0, the creation and unique code of AITO token [smartcontract] will be the success and fuel of the project.

REALSWAP

FIRST PLATFORM TO BE CREATED

RealSwap is an innovative decentralized platform that allows buyers and sellers to trade/swap digital currencies with fiat/cash directly person to person (face to face). This means that instead of having to trade crypto assets through a centralized third party like an normal Exchange, RealSwap conducts crypto swap via a decentralized anonymous way . with no KYC or personal data to give. Realswap has a unique decentralized way to login and use it. In fact there is no need to open any account . Simply connect with your wallet and you are good to start any swap available on the platform with multiple users. Realswap is a swap platform that allows connected users with their wallets to see available portfolio holdings, request a match swap and meet each other face to face to finalize digital currencies swap with fiat currencies.. Swap in 3 easy steps:

- 1** Watch Live tokens portfolio users are showing in their connected wallets.
- 2** Request a match swap via notification and chat features.
- 3** Accept match swap and meet face to face to finalized the swap.

with an optional map live track, users will even be able to see who/what digital assets are available for a swap in the neighborhood. In addition to the facilitation of swapping one digital currency for fiat currency in a decentralized manner, RealSwap will also host a number of other notable features. For instance, V1 of the platform will include a compulsory vote ranking status type in order to close the swap successfully. this compulsory framework will only be voted by users that went into third step of the swap and verified with an automated system via the blockchain. the system will verify that transactions between the two wallets have occurred and a real swap has been approved at each user's ends. from low ranking to highest ranking status, new users will have a clearer choice to swap with whoever they want to. the platform will be appealing, innovative and trustable for users. Realswap with its special mechanism that recognizes ranking of users, will distribute in an allocated way, daily reflection rewards to the highest rank users. rewards pool coming from the native token's taxes (see tokenomics) is essential and designed for the process that will encourage users to always strive for the highest rank status.

In simple words, hold Aito token, use and transact successfully on the realswap to receive rewards based on your aito token holding. the more you hold and use the Realswap, the more you earn rewards incomes. It offers Everyone another way to receive active incomes by helping bridging the real world to the crypto world through the defi world. Realswap will start its journey with the BSC blockchain. (Binance smart chain) for the ease of it use. Binance smart chain is one of the most used blockchain worldwide, having a large selections of tokens operating on its blockchain with fast and affordable transactions between users. BSC is one of the perfect match to start Realswap with. RealSwap will host and be compatible with a significant number of blockchains over time and will include newly operated blockchains that have just entered the market.

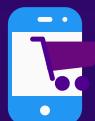

The compulsory vote ranking system is also one of the Key feature success to other platforms AITO dapp is planning to launch in Q2 2022.

Here are some sneak peak project platforms:

REALSWAP.

Just been explained above.

AITO MARKETPLACE

Imagine a platform where you can buy, sell, trade, exchange services and products or even just tip a user or artist in a decentralized and anonymous way. This is possible and trust worthy through our compulsory vote ranking system.

ART NFT

GAMING NFT

FASHION NFT

REAL ESTATE NFT

MEDIA NFT

SPORTS NFT

DATING PLATFORM CENSORSHIP RESISTANCE.

FOOD APP . THIS MARKET IS HUGE !

This is no secret that if our system works, there is no limits ! a uberfood like app platform where users are paying with crypto or cash to get their food delivered in front of their doors. state of the art system with map style research tool that matches users on accepting delivery food request of the user's nearby favorite restaurant. Think of the RealSwap but for foods delivery ! copycat food apps nowadays are not impossible to replicate but instead, can be competitive when implement with decentralized features.

AITOPAD.

Aitopad will be THE launchpad of our community. By the time we have accomplished tons of utility platforms, Aito token users will lead the example of a true and united crypto defi community through the blockchain. since it will already attract a lot of people to use our dapps. we will certainly attract a lot of attention. Any organizations could dream to launch their crypto defi project on our launchpad with high security ends and of course a tons of exposure. By simply staking affordable value of Aito tokens, Organisations can launch their tokens on AITOPAD. 3 projects are in collaboration and already in the pipeline to launch on AITOPAD. Many more projects are in the pipeline in near futures. We believe that AITO TOKEN can reach 100millions\$++ marketcap in 6 months time period from launch of AITO token.

PRIVATE SALE OPPORTUNITY.

We are in a stage where we are looking to raise some funds for the creation of the AITO project. A private sale will be offered to private investors to fund the project for its developments, marketing, and funds to start the initial liquidity of the AITO token. the private sale will be open for 2 weeks while the token is being created and part of the platform's development will start. If you are a believer in the project and wish to be part of the private sale. Reach to us and we will guide you in terms of how you can be an early investor and benefit from the AITO TOKEN PROJECT.

ROADMAP

FEBRUARY 2022

- First whitepaper for private sale
- Private sale opens for 2 weeks

MARCH 2022

- Marketing and launch of Aito token.
- Launch of first platform RealSwap.

AUGUST 2022

- Reach 100millions\$ Marketcap for Aito Token

AUGUST 2022

- Reach 100millions\$ Marketcap for Aito Token

SEPTEMBER 2022

- Create AITO's own Blockchain and fork everything to its own Blockchain.
- Create more utility and DeFi protocols on AITO Blockchain
